

Cumulative Index of the Bulletin of the Oregon Entomological Society

PDF available at http://odonata.bogfoot.net/oes/OES_Bulletin_Index.pdf

Last updated: January 4, 2021

At this point, the Index is only for the issues available electronically. Production of electronic issues in the form of PDF files began with the Spring 2011 issue. The Bulletin was printed between 1939 and 2003. It is our intent to index the printed issues as time permits, and add them to this listing. All but the most recent five printed issues are available in the Valley Library of the OSU Campus in Corvallis, Oregon. It is hoped that this index will make the Bulletin more useful to its readers.

Note: The online version of the Bulletin of the Oregon Entomological Society ran for 10 years, from Spring 2011 until Winter 2020. Ron Lyons and Jim Johnson were the editors throughout the period. No new editor was available to take over for the Spring 2021 issue so publication was suspended indefinitely.
